Experience

Amazon Web Services (AWS) – Elastic File System (EFS) / S3 Files Boston, MA
Managed, cloud-based file system offering scalable, durable storage for AWS compute workloads
Software Development Engineer II *October 2024 – present*
Software Development Engineer I *August 2022 – October 2024*
Software Development Engineer Intern *May 2021 – August 2021*

- Developed core S3 Files elastic data-pointer-map and built APIs addressing requirements from 4 scrum teams to enable file operations against that structure from both the file system view and the synchronization processes
- Led S3 Files launch metering/billing testing, safeties, and rollout of changes made by 4 separate teams; personally identified 3+ bugs prior to launch and coordinated fixes amongst myself and others
- Operational lead for features available in 40+ regions (EFS & S3Files metering, EFS Lifecycle Management, EFS Replication, EFS Backup, S3 Files exports)
    - Maintain a high bar through proactive observation, thorough root cause analysis, detail-oriented customer impact assessment, prompt/targeted event mitigation (e.g. system performance tuning or targeting code optimizations), and robust designs for long-term solutions
- Contributed to the development and delivery of multiple EFS features and systems, including the EFS Archive storage class and an internal garbage collection/cost-optimization workflow
- Leveraged the EFS data lake to analyze customer workloads and internal system state, supporting feature planning, event investigations, and customer issue resolution
- Designed and mentored 4 intern and new-hire projects, including guiding fault-injection testing for S3 Files and performance improvements to internal workflows
- Improved operational visibility and reduced alert noise by enhancing metrics, dashboards, canary workflows, and alarms across EFS subsystems

Cadence Design Systems, Inc. Burlington, MA
Software Engineering Intern *May 2020 – August 2020*

- Designed and implemented a color customization tool for Allegro (flagship chip design/layout software) using C++ and Qt framework
- Enhanced Allegro scripting framework to support tutorial recording and replay functionality
- Refactored legacy C/C++ codebase to improve maintainability and adhere to software principles

Skills

Programming/Technical Languages: Python, Java, C/C++, JavaScript, HTML/CSS
Systems & Cloud: Distributed systems, AWS, scalability, observability
Data & Analysis: Pandas, SQL, large-scale production metrics and data analysis
Spoken Languages: English, Marathi, Spanish

Education

Rensselaer Polytechnic Institute (RPI) Troy, NY
Bachelor of Science in Computer Science *May 2022*
Concentration: Artificial Intelligence and Data | Minor: Management
GPA: 3.84 | Magna Cum Laude | Dean's Honor List | Upsilon Pi Epsilon
